CONTENTS

Vol. XI, Nos. 1–6, 1953

Journal of Polymer Science

Number 1, July

Rugg, Frank M., Smith, Joseph J., and Wartman, Lloyd H.: Infrared Spectrophotometric Studies on Polyethylene. I. Structure 1

Rehner, Jr., John, Zapp, R. L., and Sparks, W. J.: Copolymerization of Isobutylene and Styrene at Low Temperatures in the Presence of Friedel-Crafts Catalysts 21

Krigbaum, W. R., and Flory, P. J.: Molecular Weight Dependence of the Intrinsic Viscosity of Polymer Solutions. II 37

Review 52

Callanan, M. Joan, and Carroll, William R.: Influence of Concentration on the Viscosity of Sodium Thymonucleate Solutions 53

Alfrey, Jr., Turner, and Berdick, Murray: A Method for Studying Crosslinking in Addition Polymerization 61

Kolthoff, I. M., and Meehan, E. J.: Redox Recipes. IX. Alkaline Nitroprusside-Hydroperoxide Recipes 71

Metz, Donald J., and Mesrobian, Robert B.: Studies on Heat Deterioration of Specially Prepared Natural Rubber Vulcanizates 83

Schultz, Allan R.: The Maximum Precipitation Temperature of a Heterogeneous Polymer (Letter to the Editors) 93

Number 2, August

Park, G. S.: An Experimental Study of the Influence of Various Factors on the Time Dependent Nature of Diffusion in Polymers 97

Barb, W. G.: Effect of Nonterminal Monomer Units on the Reactivity of Polymeric Free Radicals 117

Aggarwal, Sundar L., and Long, F. A.: Copolymers of 2-Vinylpyridine, Methyl Acrylate, and Dichlorostyrene: Polymerization and Properties in Solution 127

Condon, F. E.: Influence of Temperature of Polymerization on the Structural Composition of Emulsion Polymers of Butadiene 139

Herdan, G.: Fitting of Polymer Distributions of Molecular Weight by the Method of Moments (Errata, article in *J. Polymer Sci.*, **10**, 1–18, 1953) 150

Crank, J.: A Theoretical Investigation of the Influence of Molecular Relaxation and Internal Stress on Diffusion in Polymers 151

Williams, Malcolm L., and Ferry, John D.: Second Approximation Calculations of Mechanical and Electrical Relaxation and Retardation Distributions 169

Review 176

Sutherland, T. H., and Funt, B. L.: Dielectric Relaxation in a Series of Polyvinyl Acetals 177

SIEGEL, L. A.: Interpretation of Weak Maxima in Amorphous Diffraction Patterns (Letter to the Editors) 187
BLAUER, G.: Rate of Polymerization of Methacrylic Acid in Alkaline Solution (Letter to the Editors) 189

NUMBER 3, SEPTEMBER

COHEN, SAUL G., HAAS, HOWARD C., and SLOTNICK, HERBERT: Studies on Hydroxyethylpolyvinyl Alcohol 193
SCHLESINGER, WALTER, and LEEPER, H. M.: Gutta. I. Single Crystals of Alpha-Gutta 203
COOPER, A. C., KELLER, A., and WARING, J. R. S.: Texture of Some Crystalline Synthetic Polymers by Electron Microscopy 215
WILEY, RICHARD, H., and BRAUER, G. M.: Refractometric Determination of Second Order Transition Temperatures in Polymers. VI. Effect of Molecular Weight on the Transition Temperature of Polyvinyl Acetate 221
CLEVERDON, D., LAKER, MRS. D., and SMITH, P. G.: Uncertainties in Measurement of Osmotic Pressure of Polymer Solutions 225
WECHSLER, HARRY: A Color Reaction Involving Vinyl Chloride Containing Polymers and Pyridine 233
VAN HOLDE, KENSAL E., and WILLIAMS, J. W.: Study of the Viscoelastic Behavior and Molecular Weight Distribution of Polyisobutylene 243
MILLER, GLENN H.: Oxidation of Butadiene Popcorn Polymer 269
CONWAY, B. E., and BUTLER, J. A. V.: Effect of Rate of Shear on the Reduced Viscosities of Thymus Nucleic Acid Solutions (Letter to the Editors) 277
CRABTREE, J., and BIGGS, B. S.: Cracking of Stressed Rubber by Free Radicals (Letter to the Editors) 280
GOLUB, M. A.: Concerning a Proposed Rapid Precipitation Method of Fractionation (Letter to the Editors) 281
STEIN, R. S., and TOBOLSKY, A. V.: Determination of the Statistical Segment Size of Polymer Chains from Stress-Birefringence Studies (Letter to the Editors) 285

NUMBER 4, OCTOBER

HUSH, N. S.: Quantum-Mechanical Discussion of the Gas-Phase Formation of Quinonedimethide Monomers 289
MELVILLE, H. W., and WATSON, W. F.: Polymerization of Methyl Methacrylate by Its Polymer 299
LEEPER, H. M., and SCHLESINGER, WALTER: Gutta. II. Interconversion of Alpha and Beta Forms 307
HORIKX, M. M., and HERMANS, J. J.: Application of the Steady State Method to Benzoyl Peroxide Initiated Polymerization of Styrene 325
JELLINEK, H. H. G., and TURNER, K. J.: Thermal Degradation of Vinyl Polymers in Solution. I. Degradation of Polystyrene in Naphthalene Solution 353
HOBDEN, JOAN F., and JELLINEK, H. H. G.: Adsorption of High Polymers from Solution on to Solids. I. Adsorption of Polystyrene on Charcoal 365

ROTHMAN, S., SCHWEBEL, A., and WEISSBERG, S. G.: Sorption of Dextran to Collodion Membranes (Letter to the Editors) 379
LEACH, S. J.: Viscosity Characteristics of Polyalkyl Methacrylate Solutions (Letter to the Editors) 380
VALENTINE, LESLIE: Relation between Rate Constants, Frequency Factors, and Activation Energies in Polymerization Reactions (Letter to the Editors) 382

NUMBER 5, NOVEMBER

SCHUUR, G.: Mechanism of the Crystallization of High Polymers ... 385
KAPUR, S. L.: Chain Transfer in the Peroxide Catalyzed Polymerization of Styrene 399
KATCHALSKY, A., and LIFSON, S., Appendix by J. MAZUR: The Electrostatic Free Energy of Polyelectrolyte Solutions. I. Randomly Kinked Macromolecules 409
STOCKMAYER, W. H.: Molecular Distribution in Condensation Polymers (Errata, article in *J. Polymer Sci.*, **9**, 69, 1952) 424
KASE, SHIGEO: A Theoretical Analysis of the Distribution of Tensile Strength of Vulcanized Rubber 425

SUBJECT INDEX, VOLUME XI

Acrylate polymers, thermal degradation in vacuum, 491
Activation energies in polymerization reactions, 382
Addition polymerization and crosslinking, 61
Adsorption, polystyrene on charcoal, 365
selective, for GR-S fractionation, 583
Alpha-gutta, interconversion with beta-gutta, 307
single crystals, 203

Benzoyl peroxide initiated polymerization of styrene, steady state method, 325
Beta-gutta, interconversion with alpha-gutta, 307
Birefringence stress studies for statistical segment size of polymer chains, 285
Branching, influence on the angle of distribution of light scattered by Gaussian coils, 507
Butadiene, emulsion polymers, structural composition, 139
Butadiene popcorn polymers, oxidation, 269
Butadiene-styrene synthetic rubber, use of peroxides from autoxidized methyl oleate and linoleate as initiators, 487

Chain polymers, statistical segment size by stress-birefringence, 285
Chain transfer in peroxide catalyzed polymerization of styrene, 399
Chain transfer reactions, vinyl monomers in the presence of vinyl polymers, 531
Charcoal, adsorption of polystyrene, 365
Chlorotrifluoroethylene polymerization, kinetics, 455
Collodion membranes for sorption of dextran, 381
Condensation polymers, molecular distribution, 424
Copolymer fractions, 1:3 vinyltoluene-styrene, molecular weight, 447
Copolymerization: 2-vinylpyridine, methyl acrylate, and dichlorostyrene, 127
isobutylene and styrene, 21
vinylnaphthalenes and vinylphenanthrenes, 583
Cracking, stressed rubber by free radicals, 280
Crosslinking, polystyrene, influence on solubility and molecular size distribution, 513
in addition polymerization, 61
Crystallization, mechanism, 385

Dextran, sorption to collodion membranes, 381
Dichlorostyrene, copolymerization with 2-vinylpyridine and methyl acrylate, 127
Diffraction patterns, amorphous, interpretation, 187

Diffusion, free, concentration dependency of coefficient, 545
influence of molecular relaxation and internal stress, 151
time dependency, 97

Electron microscopy, crystalline synthetic polymers, 215
Emulsion polymers of butadiene, structural composition, 139

Fluoro polymers, kinetics, 455
Fractionation, rapid precipitation method, 281
Free radicals, effect of nonterminal monomer units, 117, 558
for cracking of stressed rubber, 280
Frequency factors, in polymerization reactions, 382
Friedel-Crafts catalysts, copolymerization of isobutylene and styrene, 21

Gas-phase formation of quinonedimethide monomers, 289
Gaussian coils, angular distribution of scattered light, 507
GR-S fractionation, by selective adsorption, 583
Gutta, interconversion of alpha and beta forms, 307

Heat deterioration, natural rubber vulcanizates, 83
Heterogeneous polymer, precipitation temperature, 93
High energy radiation, influence on swelling properties of crosslinked polystyrene, 521
Hydroxyethylpolyvinyl alcohol, 193

Infrared spectroscopy, polyethylenes, 1
Initiators from peroxides from autoxidized methyl oleate and linoleate, 487
Interconversion, alpha and beta forms of gutta, 307
Internal stress and molecular relaxation, influence on diffusion, 151
Isobutylene, copolymerization with styrene, 21

Kinked macromolecules, electrostatic free energy, 409

Light scattering by Gaussian coils, effect of branching and polydispersity, 507
Linoleate, autoxidized, as origin of peroxides as initiators, 487

Methacrylate solutions, polyalkyl, viscosity characteristics, 379
Methacrylic acid, rate of polymerization, 189
Methyl acrylate, copolymerization with 2-vinylpyridine and dichlorostyrene, 127
Methyl methacrylate polymerization, 299
initiation, 471
Methyl oleate, autoxidized, as origin of peroxides as initiators, 487
Molecular distribution, condensation polymers, 424
Molecular relaxation second internal stress, influence on diffusion, 151
Molecular size distribution, crosslinked polystyrene, and solubility, 513
Molecular weight, dependence of intrinsic viscosity, 37
1:3 vinyltoluene-styrene copolymer fractions, 447
Molecular weight distribution, fitting, 150
from kinetic schemes, 558
polyisobutylene, 243
Monomer units, nonterminal, effect on reactivity of free radicals, 117, 558
Morphology, synthetic crystalline polymers, 567

Nitroprusside-hydroperoxide recipes, 71

Optical activity, vinyl polymers, 559
Orientation processes, synthetic crystalline polymers, 567
Osmometer, instrument, 447
Osmotic pressure measurements, uncertainties, 225
Oxidation, butadiene popcorn polymers, 269

Peroxide catalyzed polymerization of styrene, chain transfer, 399
Peroxides as initiators of butadiene-styrene synthetic rubber, 487
Polyacrylates, liquid, 539
Polyalkyl methacrylate solutions, viscosity characteristics, 379
Polydispersity, influence on the angle of distribution of light scattered by Gaussian coils, 507
Polyelectrolyte solutions, electrostatic free energy, 409
Polyethylenes, infrared spectroscopy, 1
structure, 1
Polyisobutylene, viscoelastic behavior and molecular weight distribution, 243

Polymer chains, statistical segment size by stress-birefringence, 285
Polymerization rate, methacrylic acid, 189
Polymerization reactions, rate constants, frequency factors, and activation energies, 382
Polystyrene, adsorption on charcoal, 365
crosslinked, solubility and molecular size distribution, 513
crosslinked, swelling properties by high energy radiation, 521
in naphthalene, thermal degradation, 353
Polyvinyl acetals, dielectric relaxation, 177
Polyvinyl acetate, refractometry, 221
transition temperature, 221
Popcorn polymers, of butadiene, oxidation, 269
Precipitation method of fractionation, 281
Precipitation temperature, heterogeneous polymer, 93
Pyridine, color reaction with vinyl chloride and polymers, 233

Quantum-mechanics of gas-phase formation of quinonedimethide monomers, 289
Quinonedimethide monomers, gas-phase formation, quantum mechanics, 289

Ramie, x-ray small angle scattering, 433
Rate constants, in polymerization reactions, 382
Rayons, x-ray small angle scattering, 433
Reactivity of free radicals and nonterminal monomer units, 117
Redox recipes. IX, 71
Refractometry, polyvinyl acetate, 221
Relaxation, dielectric, of polyvinyl acetals, 177
electrical, second approximation calculation, 169
mechanical, second approximation calculation, 169
Retardation distributions, second approximation calculations, 169
Reviews
